In 2012, the cost of AutoCAD For Windows 10 Crack licenses (design software with this application) was as high as \$2,499. Licenses for companies whose engineers use AutoCAD include: \$7,999 for personal use; \$1,749 for academic use; \$2,599 for a one-year subscription; \$4,999 for a five-year subscription; \$7,699 for a 10-year subscription; and \$11,499 for a 20-year subscription. In 2014, Autodesk estimated the cost of AutoCAD licenses for users in the construction industry (construction companies, civil engineers, construction workers, etc.) to be as high as \$5,200 per license. The following data is based on cumulative licensing data obtained from Autodesk's online platform (based on the public company financial reports) from June 2013 to September 2016 (note that, as of November 2016, we have not seen an update to the company financial reports, but as of November 2017, the company has issued its annual report, and we have not received any information about changes to the company's financial statements since then). This data is for the company's annual and quarterly results from 2014 to the latest quarterly report. The following financial data is based on the company's financial statements for the years ended December 31, 2014, 2015, and 2016, published as separate annual reports in the company's Annual Report (and again in the company's quarterly financial report for the periods ended September 30, 2015, and 2016). In November 2017, the company has issued its annual report for the year ended December 31, 2016. As of that date, we have not received any information about changes in the company's financial statements since then. We note that the data we have presented here is aggregated, and does not cover all Autodesk's revenue or expenses. Product Description Historical Pricing As of December 31, 2016, Autodesk reported that it had 3,692 AutoCAD users (total AutoCAD licenses sold) worldwide, as well as 72,350 users of the software application, which is a mobile version of AutoCAD. The global AutoCAD market, based on this information, is approximately \$1.13 billion (for the latest year available, 2016). (For the latest year available, 2016, the AutoCAD market was larger, but in terms of percentage growth, it has been shrinking.) Worldwide
