Deflector takes a world which breathes, casts (and shouts at you) a spell and develops...\. In this game you control your destiny by leading a young deflector. That is what you have to do in order to fulfill your destiny. Your destiny is to carry out the deed of the game. So, you will have to take three levels of higher classes, complete the quests of the game, unlock new doors and collect the five pieces of the magic wand. The third chapter will be released as a free update to our existing players. (The basic mechanics you will find in Deflector are the most well known and used. The game is primarily about action with a set of logical thought-provoking puzzles at the end of each quest.)

Character Development: You have many backgrounds from which to choose; such as: - Warrior, - Magic-user, - Fighter, - Thief and - Huntress. The result is a set of characteristics you have to choose from (on the first playthrough). Your character has quite a few skills. They can be enhanced (and corrected) as long as you have enough magic points (MP). Quests: You shall receive quests to collect many artifacts: - The Big Magic Wand - The Little Magic Wand - The Black Stone - The Blue Stone - The Golden Stone - The Diamond Stone - The Red Stone - The Violet Stone - The Emerald Stone - The Green Stone - The Gray Stone Each item will give you some XP and Magic Points which you can spend on leveling up. To prevent you from playing too much, the game had a cooldown, which will prevent you from using the same magic wand every time (at least for a short period of time).

Combat: At the end of the first chapter, you have both, normal attacks and special attacks. =>With normal attacks you will select weapons and attack =>With special attacks you can use one or two characters and the special attack has been chosen in which you use. During combat you can guard to prevent spells being used against you. Things which affect you: - your hit points (HP) - your magic points (MP) - the cooldowns for the special skills - the number of magic points (MP) available At the end of the first chapter, you also have to collect

The primary focus of this game is Free-Flow Combat and in-game flow animations. This means that a lot of the game has a custom chip that governs the flow of combat, with its own hooks for animation. You'll learn that as you progress through the game. R.E.A.C.H. is a satirical look at what it means to be human - the story pits our AI protagonist against the wall as they adapt to a physical body and explore life on earth. This game uses a custom pixel-art engine called "pixeljuice" - an all-in-one pixel and sprite-art engine. REPLACED is a side project I have been working on since 2009, which started life as a small one man side project, which in to time grew to a team of 20. I am a developer who has worked in the games industry for 15 years and currently, at the age of 39, own and run my own company. I was raised in Northamptonshire, England. REPLACED is a side project funded by KickStarter. What is REPLACED? A 2.5D sci-fi retro-futuristic action platformer set in an alternate 1980s America, with free-flow action combat and a deep, dystopian story. You play as R.E.A.C.H. - an artificial intelligence trapped in a human body against its own will, striving to adjust to human life, in and around Phoenix-City. Outlaws are rife in a society that has sustained lasting damage and taken a turn for the worse, following a catastrophic nuclear event. Everything is ruled by corruption and greed and the ones in power see humans and their organs as nothing more than currency. REPLACED focuses on a single player experience, with a mix of cinematic platforming, pixel art and free-flow action combat. Set in a complex gritty stylized cyberpunk inspired world combined with deep engaging dystopian story set in an alternative past. Explore and uncover its mysteries as R.E.A.C.H. who is beginning to understand that everything comes at a price. About This Game: The primary focus of this game is Free-Flow Combat and in-game flow animations. This means that a lot of the game has a custom chip that governs the flow of combat, with its own hooks for animation. You'll learn c9d1549cdd
